

Product Description:

RQP is a multi-purpose 100% solids epoxy repair paste for fast-track repairs and an excellent adhesive for flooring accessory installations. **RQP** is a two component thixotropic compound that is easily applied directly from the Dual Cartridge Kit, or using a putty knife, trowel or plastic applicator out of bulk kits.

RQP's easy workability and rapid cure time make it an ideal product for last minute "touch ups" to missed pop-outs or small cracks in a substrate prior to applying a coating system. **RQP** is used to repair chips, defects, small voids or "honeycombing" in horizontal, vertical and overhead concrete substrates. **RQP's** excellent bond strength, thick consistency and quick setting attributes make it an ideal adhesive to use when setting pre-formed "speed cove", terrazzo strips or termination caps. **RQP** can be sanded immediately after cure and is strong enough to be drilled, tapped or shaped as needed to conform to the substrate being repaired.

Physical Testing Information:

Volume mix ratio:	1 to 1
Viscosity (mixed):	125,000 CPS
Solids Content (%):	100% solids
VOC:	VOC/HAPs compliant
Application Temps:	50 ⁰ - 80 ⁰ F.
Hardness (ASTM D-2240)	85 (Shore D)
Gel Time	15 minutes
Dry to Touch (recoat with compatible product)	30 minutes
Through-Cure (able to sand)	45 minutes

Please review ROCK-TRED's Product Data Sheet and SDS for further information on this product. All physical testing information is from performance testing run on neat coats of the tested product unless otherwise indicated.
